THE FIVE DEMANDS
get Europe moving!

…get Europe moving!

For a Europe of the people, by the people and for the people.

We, the undersigned, demand the following reforms for a truly democratic, accountable and efficient EU:

1. True European elections, contested by real, pan-European parties, running common campaigns across the EU.
2. Each EU party nominating its candidates for Commission President and Commission members ahead of European elections. The Commission will then be composed of members of the winning party (or coalition of parties) in the directly elected European Parliament.
3. The European executive must be accountable to the European legislature. The European Parliament needs to have greater scrutiny of Commission and Council decision-making powers and be given the right to initiate legislation.
4. Decisions on Commission legislative proposals to be taken on equal footing by the Council representing EU governments and the directly elected European Parliament representing the people.
5. We ask for greater consultation of civil society and stakeholders when EU legislation is drafted and for greater communication and constant open dialogue between EU citizens and EU institutions.
